

Harris 4D-S High Speed Combination Folder 578mm 22.75" Cutoff

Discover Graphics has just brought into inventory this beautiful 1993 Harris 4D-S high speed (45,000 IPH) combination folder. The folder has low usage as it was coupled to a Harris M1000B that also was equipped with a finishing line system and sheeter for optional products.

The 4D-S is a highly sought after folder due to it's rotary chopper and on-the-fly adjustments. This folder is capable of magazine, tabloid and double parallel folds. During the run the operator can adjust lap, perforation, former board, brush and head stops.

This folder is available for immediate delivery. There is also an optional Innotech ribbon deck available.
